

Are you a decision maker who wants to learn about circular economy?

Then this HSSMI Bootcamp is for you. Our subject matter experts in circular economy will explain how circular economy principles can be applied in complex environments, aiming to make your business more profitable, innovative, and environmentally sustainable.

The Bootcamp will cover:

- Developing **roadmaps** to accelerate circular benefits for your business
- Access to the **exclusive HSSMI Circular Economy Network**
- Circular economy in **complex** and **high risk** environments
- Access to a **library of reports** and **further CE content**
- Diagnostic circular economy readiness assessment**
- Focus on **manufacturing and other industries**
- Opportunity to **network**

Why have we created the Circular Economy Maturity Assessment?

Adapting to and implementing circular economy principles requires systemic thinking. HSSMI recognises that there is a lack of support and information aligned to the industry standards for circular economy. This tool addresses the gap and supports decision makers within businesses.

“This is an excellent, well presented and well structured workshop... The introduction is professional and thought provoking. Even better though are the case studies which add depth and colour. The level of audience participation is pitched just at the right level.”

Dr Andrew Nurse | Construction Scotland Innovation Centre

What is it?

The Circular Economy Maturity Assessment (CEMA) is a business self assessment tool developed by HSSMI. It allows businesses that are considering the adoption of circular economy principles to assess their capability and readiness to do so.

Circular Economy Readiness

Themes	Questions
Systems Thinking	Is systems thinking evident within your organisation?
Innovation	How strong is the innovation culture in your organisation?
Stewardship	Does your organisation consider the environmental and social risks and opportunities associated with resource management?
Value Optimisation	How does your organisation approach value optimisation?
Transparency	How transparent is your organisation in sharing information on resource management?

Thinking

Unformed	Basic

Doing

Improving	Engaged	Optimising
